- 4 - Students will gain an appreciation for the historical and cultural elements contained within law enforcement environment of local, state, national, or international areas*

Cybersecurity

- 1 - Students will gain an understanding of the fundamental concepts of secure computing and network communications.*
- 2 - Students will gain an appreciation for the technological aspects of law enforcement and information security.*
- 3 - Students will gain an understanding of the planning process, development, and implementation of a comprehensive information security program within organizations.*
- 4 - Students will gain an appreciation for the fundamental principles and techniques of data management and network security as well as their applications within organizations.*

Engineering and Physical Sciences

- 1 - Provide students with a solid foundation of knowledge through program related courses*
- 2 - Integrate program specific methods to develop analytical and critical thinking skills.*
- 3 - Provide students the opportunity to develop written & oral communication skills required for relevant professional fields*

History

- 1 - Introduce students to the skills necessary to develop critical thinking and creative presentation in oral and written contexts*
- 2 - Expose students to a variety of topical fields that provide a solid foundation in History.*
- 3 - Analyze, critique, and construct responses to the challenges of the marketplace and human society*
- 4 - Introduce cross-cultural understanding through examining international cultures and political systems*

Humanities

- 1 - Introduce students to the skills for lifelong learning, including the ability to think critically and creatively in oral and written contexts*
- 2 - Expose students to a variety of disciplinary fields that provide a solid foundation in the Humanities.*

3 - Analyze, critique, and construct responses to the challenges of the marketplace and human society

4 - Introduce cross-cultural understanding through examining international cultures and political systems

Health Science

1 - Provide students with a solid foundation of knowledge through program related courses

2 - Integrate program specific methods to develop analytical and critical thinking skills.

3 - Provide students the opportunity to develop written & oral communication skills required for relevant professional fields

Political Science

1 - Introduce students to the skills necessary to develop critical thinking and creative presentation in oral and written contexts

2 - Expose students to a variety of topical fields that provide a solid foundation in Political Science.

3 - Analyze, critique, and construct responses to the challenges of the marketplace and human society

4 - Introduce cross-cultural understanding through examining international cultures and political systems

Security Studies

1 - Students will understand the law enforcement and legal aspects of national and international issues.

2 - Students will gain an appreciation for the technological aspects of homeland security issues.

3 - Students will understand the theoretical and practical aspects of decision making in intelligence gathering, emergency management, and public safety.

4 - Students will gain an appreciation for the historical and cultural elements contained within national and international security and political policy issues.
